

Blaž Šnuderl

Curriculum vitae

WORK EXPERIENCE

JUNE 2014 – AUGUST 2014

Tridens, Maribor

RoR development and CI

My work consisted of two parts. First month I was working on setting up continuous integration for a large Java Enterprise project, that previously had no tests automated tests. I refactored the project to use Maven for the whole process from compiling to deployment. Previously the project could only be run and deployed using Eclipse. I also set up a private Jenkins instance where project was being continuously tested.

On my second month I joined a team developing a Ruby on Rails portal for a telecommunications company. My work consisted mostly of back end work. Some of the other stuff I ended working on was search with Solr and using Redis as a background job queue.

JULY 2013 – SEPTEMBER 2013

Frembassy, Ljubljana

Web developer

I was part of a small team working on a single page web application for a large automotive company. Client side code was written using the AngularJS framework. For back end we used Python running on Google App Engine. My work was evenly split between both front and back end work. I did everything from large code refactoring on the client side to creating new database models and constructing indexes on Google's Datastore.

PROJECTS

2013 **Trainer Jim - Imagine Cup competition**

Gym application written in Ruby on Rails and Knockout. Made it to the finals in Slovenian Imagine cup competition.

2012 **Codebase (<http://codebase.apphb.com/>)**

Knowledge sharing site partially inspired by Stack Overflow. Developed using Microsofts technology stack, C#, ASP.Net MVC, Entity Framework.

Projects (snuderl)

Lots of smaller projects are available on my Github profile

EDUCATION

2012 – 2017 **Computer science**
MASTERS DEGREE
FERI, Maribor

2008 – 2012 **Informatics**
FERI, Maribor

SUMMER 2012 **Summer school on Machine Learning**
FRI, Ljubljana

LIFELONG **Online coursers (MOOC's)**
COURSERA, EDX
Finished multiple online coursers (MOOC's) on topics such as Machine Learning, Functional programming, Low level programming, probability.

SOFTWARE SKILLS

OVER 10000 LINES: Python, Java Script, Java

OVER 5000 LINES: C#, Ruby, Matlab

FAMILIAR: C++, Haskell, Lisp, R

BUZZWORDS: Git, Unit testing, Continuous integration, Android, MVC, Vim

COMMUNICATION SKILLS

SLOVENIAN Native speaker

ENGLISH Fluent

GERMAN Basic
